

# Al Siamon Perspective on Cleanshield

- HOW Cleanshield works on the human body
- HOW to use Cleanshield

Cleanshield has a PH of approximately of 11.2 which is 30,000 times higher than the neutral 7. The highest that people normally drink is 9.5 which 950 times higher than 7.

When Cleanshield is ingested it dramatically increases the ph in the stomach. when this occurs, the body automatically produces more acid **and alkalinity** at the same time. This is like being hit with a defibrillator and awakening the immune system, which when functioning at its full capability is able to fight any and all diseases.

Modern medicine knows the importance of Alkalinity, but up until now they have not had any tool to test or increase the body's PH. They understand and acknowledge the value of an alkaline body but they do not attempt to address the issue because they have nothing to remedy it.

Here is a protocol for the use for Cleanshield:

Drink 30ml of Cleanshield three times a day, either 30 minutes before or after drinking and eating, is the basic protocol.

People who weigh less than 120 lbs can drink 20ml three times a day.

Children under 10 should start with only 15ml three times a day.

In some cases, after 10 days of use, it helps to increase the dosage. We recommend 30ml SIX times a day for three days, and then go back to 30ml three times a day thereafter. If necessary, go back to six times a day at three day intervals. Depending on the ailment, this may be necessary to enhance the healing process and is also recommended for cases of very seriously ill people.

About 10% of Cleanshield users experience a physical effect called de-tox. Some of the symptoms are as follows: In some cases people pimples all over their bodies - this is the result of poisons leaving the body. Some get flu-like symptoms, some experience dark and smelly urine, and in other cases rashes, or nausea.

ALL go away normally within 3-5 days. It is recommended to reduce the amount taken daily, but not to stop. It is important to rid the body of these toxins and poisons that the body has stored for years. Once the body has released the poisons and your body temp has dropped, you are far less likely unable to get ill again.

I recommend using PH strips as a diagnostic tool. These strips you the pH condition of the patient's body before starting treatment AND you can also see your body's PH go up as you start drinking Cleanshield.

Also, please check the patient's body temperature – as this is very important indicator of how well Cleanshield is working.

In a short period of time the body temp will start dropping. In the scientific world, it has been observed that for every degree of lowered body temperature there is an increase of longevity of 20 years. The Scripts Institute has done extensive studies on this and has demonstrated this to be scientifically proven true.

In my own case, my morning temperature averages 95.6. I am 81 years of age, with no physical ailments, and I take no pills.

#### My Testimony

"5 years ago, I had high blood pressure, and enlarged heart, restricted blood flow, high cholesterol; all of this is gone since I have been drinking Cleanshield. My doctor says that my wife and I are 2 of his healthiest patients in all of his practice, regardless of our age."

Another use for Cleanshield is the **topical use**. I discovered that the body topically loves the high pH nature of Cleanshield. I have seen used on psoriasis, skin ulcers, diabetic ulcers, skin cancer, burns, and open wounds - in fact on anything having to do with the skin, even diaper rashes. I found that Cleanshield works just as effectively on the outside as it does on the inside of the body

I also understand that diabetes is a serious problem in Africa as it is in the world. Diabetic ulcers, in USA alone, 80,000 people year loose a limb because of diabetic ulcers. In addition, you can also spray this in your eyes, for people with eye diseases, as well.

This is truly God's gift to the world.

*Al Siamon*

P.S. My hope and prayer is that I can get Cleanshield into the world in need, as soon as possible.
